# BLOSSOM-II CLASSROOM

## SWIMMING INTO MARCH

Hello Families!

We're swimming into March and this month we're exploring the ocean.

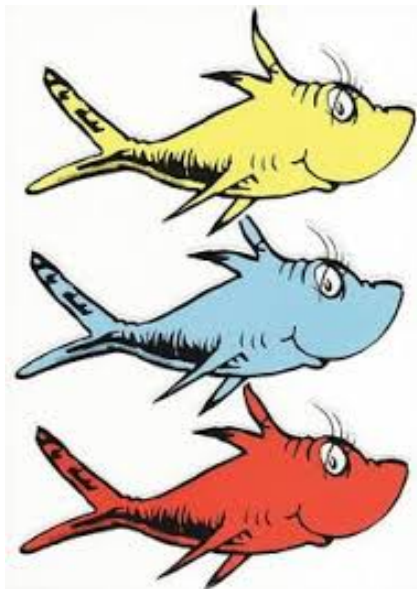

Blossom I classroom will focus our attention on the various oceans found around the globe. The kind of water in the ocean, ocean animals and their characteristics, and jobs people have related to keeping the ocean safe and clean for all to enjoy (fisherman, oceanographer, marine biologist, etc.).

Learning about the ocean is important because we share our planet with the animals and creatures of the sea. Understanding our oceans helps our students have a better appreciation for the ocean and

**Kids Corner**

Preschool & Childcare

want to take care of it.

Additionally, learning about the ocean helps our students make connections between humans and their environments.

To help support our learning and projects we'd love if you could share any ocean artifacts (sea shells, shark teeth, sand dollars)

family photos from trips to the ocean, or ocean related tools for pretend play (toy fishing rods, pretend tropical fish, snorkeling gear, flippers and binoculars, or magazines with photos of the sea.

It's going to be another fantastic month.

Ms. Linda
